CLEAN VERSION OF AMENDMENTS

IN THE CLAIMS

Please add claims 51-70, as follows:

---

1   --51.   The method of claim 2, said detecting whether said video display unit is newly

2   coupled to said connecting unit corresponding to detecting whether a hot-plugging of said video

3   display unit occurs.

1   --52.   The method of claim 51, said hot-plugging of said video display unit

2   corresponding to connecting said video display unit to said connecting unit after booting process

3   of said processing unit is completed.

1   --53.   The method of claim 2, said detecting being performed after booting process of

2   said processing unit is completed.

1   --54.   The method of claim 2, said polling operation being performed after booting

2   process of said processing unit is completed.

1   --55.   The method of claim 6, said detecting whether said video display unit is newly

2   coupled to said connecting unit corresponding to detecting whether a hot-plugging of said video

3   display unit occurs.

1 --56. The method of claim 55, said hot-plugging of said video display unit

2 corresponding to connecting said video display unit to said connecting unit after booting process

3 of said processing unit is completed.

1 --57. The method of claim 6, said detecting being performed after booting process of

2 said processing unit is completed.

1 --58. The method of claim 6, said polling operation being performed after booting

2 process of said processing unit is completed.

1 --59. The method of claim 7, said detecting whether said video display unit is newly

2 coupled to said connecting unit corresponding to detecting whether a hot-plugging of said video

3 display unit occurs.

1 --60. The method of claim 59, said hot-plugging of said video display unit

2 corresponding to connecting said video display unit to said connecting unit after booting process

3 of said processing unit is completed.

1 --61. The method of claim 7, said detecting being performed after booting process of

2 said processing unit is completed.

1   --62.   The method of claim 7, said polling operation being performed after booting

2   process of said processing unit is completed.

1   --63.   The method of claim 8, said detecting whether said video display unit is newly

2   coupled to said connecting unit corresponding to detecting whether a hot-plugging of said video

3   display unit occurs.

1   --64.   The method of claim 63, said hot-plugging of said video display unit

2   corresponding to connecting said video display unit to said connecting unit after booting process

3   of said processing unit is completed.

1   --65.   The method of claim 8, said detecting being performed after booting process of

2   said processing unit is completed.

1   --66.   The method of claim 8, said sensing of said interrupt signal being performed after

2   booting process of said processing unit is completed.

1   --67.   The method of claim 9, said detecting whether said video display unit is newly

2   coupled to said connecting unit corresponding to detecting whether a hot-plugging of said video

3   display unit occurs.

-4-

1   --68. The method of claim 67, said hot-plugging of said video display unit

2   corresponding to connecting said video display unit to said connecting unit after booting process

3   of said processing unit is completed.

1   --69. The method of claim 9, said detecting being performed after booting process of

2   said processing unit is completed.

1   --70. The method of claim 9, said sensing of said interrupt signal being performed after

2   booting process of said processing unit is completed.--
